The invention provides complete or partial genomic sequences of the MSRV-1 pol gene, gag gene and env gene, and polypeptides encoded by these genes. The invention also provides antibodies raised against the polypeptides. The genomic sequences, polypeptides and antibodies are also clasimed useful for diagnosing infection by MS and rheumatoid arthritis-associated viruses, and also for prevention and treatment of infection with these viruses.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Sequence

The specification describes a long terminal repeat (LTR)-RU5 region which encodes the expression of a MSRV-1 protein. This is unusual for LTRs, in particular in the RU5 region. The sequence includes CAAT and TATA signals which are present in the U and R regions and are not directed towards the CDS indicated in the Gastures table. Probes and antibodies to the MSRV-1 retrovirus protein and encoding polynucleotide sequences are used to detect the presence of MSRV-1 retrovirus in a biological
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   WPI;
